

Remote Breathalyzer App

An **all-in-one remote** alcohol testing solution

A wireless **breath alcohol testing** solution

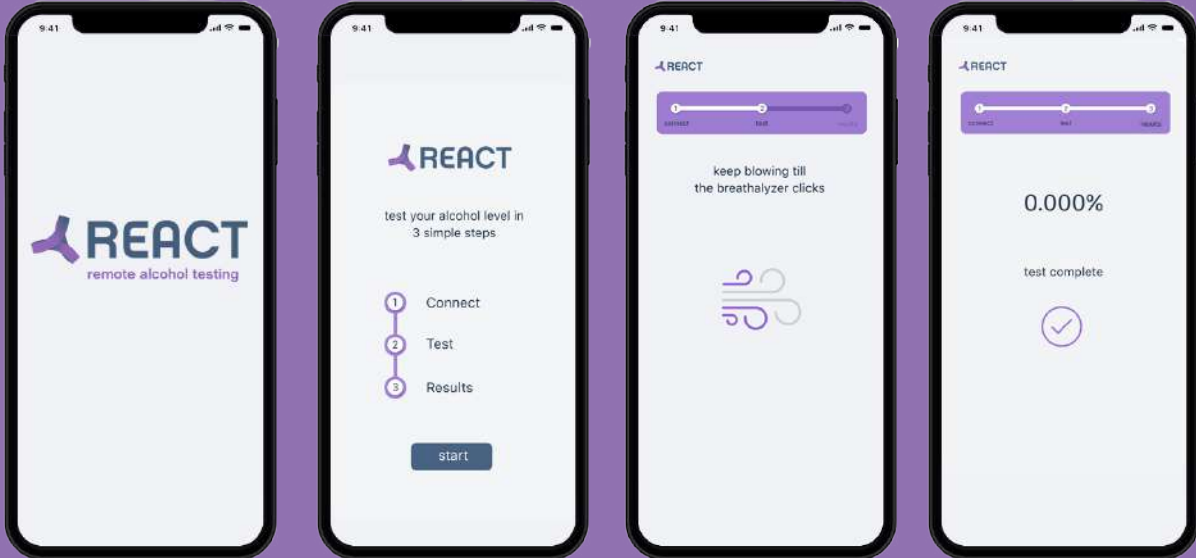

DIMS provides a **locked cell phone** with a **SIM card**, a **breathalyzer device**, and the integrated software with case management and lab management to completely control and provide secure and randomized on-demand testing.

Features

- ✓ Breathalyzer testing **without internet dependency**
- ✓ A high resolution camera and **Automated Facial Recognition** ensures accuracy and authenticity
- ✓ Real-time verification
- ✓ No more manual photo or video reviews
- ✓ App push notifications and text notifications for randomized testing
- ✓ History of all results is transferred to the lab and case management systems automatically
- ✓ Can be used by probation staff for geo-fencing and location cannot be spoofed

Once your participant receives their device, they can go from unboxing to receiving test results **in less than 24 hours**—it's that simple. Results are delivered to you instantly along with photo verification.

Completely secure and easy to use on-the-go. Available on iOS and Android

99%
accuracy
in automated
facial recognition
