

**The best  
case management system  
for problem-solving courts!**

A screenshot of the DIMS desktop application. The interface is clean and professional, with a dark blue header bar containing the DIMS logo and user information. The main content area is divided into a left sidebar with a participant profile picture and a list of menu items, and a central form area. The form is titled 'Participant Profile' and contains various fields for personal information, including name, date of birth, marital status, and contact details. The form is organized into sections with expandable/collapsible arrows.

## Track and manage your participants

- Communicate with your participants in real time
- Send positive affirmations
- Track location and compliance with check-ins
- Send Documents and Surveys
- Real-time drug testing results with 3rd party integrations
- Measure breath alcohol with a mobile REACT breathalyzer
- Post graduation tracking in the Recovery Management module
- Case Planning

## Your participants can

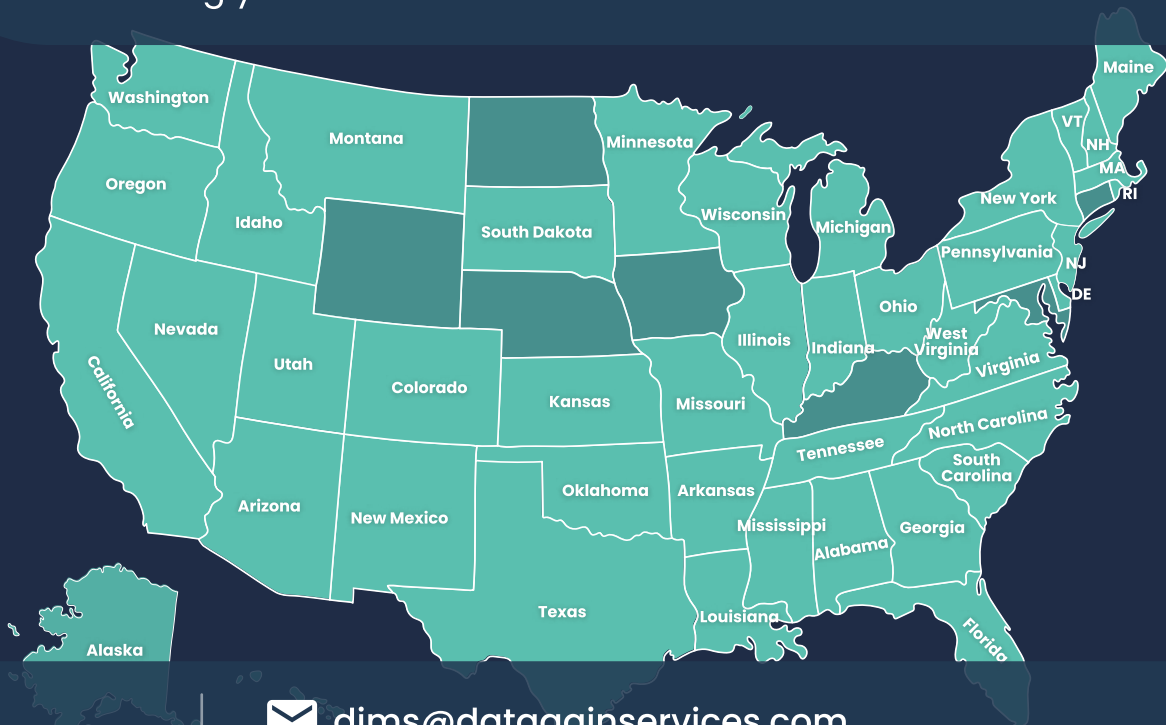

- See their phase information
- Know what goals have to be completed to phase up
- Remain motivated with access to days in phase, sober days and goal tracking in the app
- Track their fees and payments in the app
- Receive real time alerts for tasks due

## For your staff members:

- Court staff are auto-informed on participants' weekly performance in real time
- Staff app allows mobile participant management
- Manage staff attendance
- Role based access
- Officer Safety app
- Customized court dockets for each type of problem solving court.
- Fully customized staffing report
- Integrated assessments
- Real time alerts
- Unlimited training on DIMS

## Court performance

- Most comprehensive reporting and analytics available today
- Understand biases and understand what your court data is telling you
- Understand how your court and staff are performing
- Learn what should change to improve graduation rate and reduce recidivism
